- Tomato club
- Index

## Odla tomater

Åke Truedsson  
180x230, 128 pp

**G**rowing *tomatoes* contains practical information about cultivating tomatoes – from seeds to harvest. Here are also twenty or so recipes in which tomatoes play the major part. More than 40 varieties of tomato are described in words as well as pictures – beautiful red, green, yellow, striped, flamed, small and large, round and oblong. Some do well on your balcony or window sill, others in the garden or greenhouse.

## About the author:

**Åke Truedsson** has run a tomato club with a gene bank with about 700 varieties for the last fifteen years. He holds courses and lectures and is a well-known garden personality. He has written several books, including *Grow your own vegetables* (2011).
