

SWEDEN – JUST AMAZING

Anita Shenoï

190x210, 128pp

For a small country, Sweden has a remarkable track record of delivering ideas and innovations with global impact.

From dam-busting dynamite and the humble home refrigerator to Skype and Spotify, Swedish inventions have been changing the way we live, decade after decade. And while just over one hundred years ago, Sweden was one of the poorest countries in Europe, it is now the leader of innovation among EU member states.

So how did Sweden get to be so amazing? And will it continue its winning streak?

Why not join me on this regional tour of the country to investigate the past, present and future, the brilliant and the downright quirky, and see for yourself how Sweden keeps putting ideas and innovations on the map!

About the author:
