Skillnadens trädgård

Sara Bäckmo

190x245, 176p

Sara Bäckmo transformed an overgrown piece of land into an ecological kitchen garden larder and in the process gained a new passion, *Skillnadens trädgård* (The Garden with a Difference). Breaking all the rules of the novice cultivator to start on a small scale and then increase, Sara started big. And increased to bigger. Sara in a variety of ways extends the cultivating season and so makes it possible for the family to eat freshly harvested produce throughout the whole year. A part of the harvest is stored to be eaten during the winter months.

In *Skillnadens trädgård* (The Garden with a Difference) Sara shares the joy that she feels over her vegetables, fruits and berries. She gives simple and practical advice on how to become largely selfsufficient in vegetables. It has a lot to do with testing one's way ahead, daring to experiment and living with the kitchen garden, as opposed to simply having a vegetable cultivation. And the great thing with a kitchen garden is that however things turn out this season there will always be a new spring to start again.

About the author

Sara Bäckmo is a journalist, writer and influencer who cultivates and writes about *Skillnadens trädgård* on Sweden's biggest gardening blog sarabackmo.se
