*What happens to old books no one reads any more?*

In many ways old books are inspiring and do not become useless even though the content is out of date. Katri Oikarinen gives new life to old books in the shape of various utensils and decorative items.

This book has over 40 ingenious and beautiful bookcraft ideas, combining diversity, ecology and easy accessibility of the material. Old books are used ingeniously in different ways, such as whole or pages and book-covers separately.

Creatively recycling a discarded book is a much more valuable fate than it ending up in a landfill. This book with plenty of illustrations suits hobbyists, interior decorators and all those enthusiastic about recyclable materials; while it also encourages the readers to develop their own ideas.

## About the authors

**Katri Oikarinen** is an artist-artisan.

The basic starting points of her work include esthetics, the joy of insights and ecological aspects.
