## Virkad mönstermagi

Maria Gullberg

170 x 220, 112 p

*With its foundation in grandma's homespun squares Maria Gullberg explores the possibilities of crochet. She shows how using squares we can make exciting patterns that bring to mind the flower bed, twill, African fabrics and the 1950s.*

The book contains around 20 patterns and several finished products such as pillows, a bag, carpet and blanket. For every pattern there are clear crochet diagrams which makes it easy to crochet correctly. The level of difficulty in the projects varies from easy to advanced – even if you have a high level of skill you will be challenged! At the beginning of the book are clear instructions on the types of crochet stitches and how to connect the squares. Here are also tips on changing colours and a conversion table for crochet hooks.

“You who hold this book in your hand can come on a journey with its origins in grandma's classic crochet square and then on to explore exciting new forms – and the journey never ends!”

Maria Gullberg

## About the author

Maria Gullberg was educated at *Konstfack* and leads the renaissance of crocheting in Sweden. She has over the years developed techniques and used an experimental approach to find new and exciting structures and patterns. She is active as a designer and motivator in both courses and exhibitions. This is Maria Gullberg's fourth book published by *Hemslöjdens förlag*.
