This is the book for the fashion conscious knitter who has come quite a long way with their knitting and is looking for new challenges. Fine knitted items of clothing take a little longer to finish, but the fit is so much better and you get jumpers that don't go out of fashion so quickly.

Isager's style is classic with a high awareness of fashion, and there is nothing to compare among the knitting patterns that are otherwise available. She is a star in the making!

The book is richly illustrated with photos by Lizette Kabré and Simon Lereng Willmong.

The yarns used in the book are all Isager-yarns but they are well described so readers can find substitutes with the same characteristics. All yarns can be found in the webshop mentioned in the book.
