Heavy duty sewing

Anton Sandqvist

175x260, 128 p

Heavy duty sewing is about, with needle and thread, a sewing machine and using stiff materials, making one's own practical, hardwearing functional objects such as rucksacks, bags and tool cases. The book is aimed at all practised home sewers who are keen to try something new, but perhaps above all at those who find the idea of sewing fun but may not have come up with a suitable project, or never even used a sewing machine before.

The book explains the basics in making textile products, such as suitable materials to use, equipment and work techniques. In the process we learn all about leather and how to repair our own belongings. The techniques are then put into practice, in the ten projects in the book, for countryside, town and travel, for example hiking rucksacks, tool cases, vanity bags and aprons.

There is no difficult stitching here; it simply demands some patience and attention to detail. It's amazingly good fun and will result in attractive, useful objects. Welcome to heavy-duty sewing!

About the author

Anton Sandqvist in partnership with his brother Daniel and friend Sebastien, founded the bags company Sandqvist in 2004, which today exists in over 30 countries around the world. He has for many years sewn his own equipment for hiking, mountaineering and MC riding, and has in this way picked up an enormous amount of tips and knowledge to pass on.
