I love paper

Fideli Sundqvist
190 x 240, 128 pp

Fideli Sundqvist is one of Sweden's best paper cut artists.

Through various means of working with paper, she creates figures in 2D and 3D. From silhouettes and sculptures to built-up stories and props. By following Fideli in her studio, we get to see how the most incredible objects are created in paper.

I love paper is a practical book of inspiration with about 40 paper projects, everything from geometric figures, multi-storey buildings, flowers and various food dishes to how you build up entire settings and stories in paper. Besides an introduction to various basic techniques, the book contains lots of tips, ideas and step-by-step instructions.

About the author:

Fideli Sundqvist graduated in Graphic Design and Illustration from Konstfack in Stockholm in 2011 and since then has worked full time as a paper cut artist. Apart from advertising and display projects for companies around the world, she has had several exhibitions on themes such as Summer, Paper Flowers and Tasteless.
