A book for all those who do not understand the regular knitting books

Whether you know nothing about knitting, are an unsure beginner or a handicraft teacher's nightmare, with these instructions you learn to knit socks, mittens, caps, scarves and other accessories. You do not need to know anything about knitting in advance, because this book teaches you everything step by step.

The knitting instructions of the book advance from the really easy basic stitches you can use from scarves and legwarmers to plain socks and mittens, in which we also try textured and colourwork knitting techniques. Easy knitwear can also be impressive!

About the author

Sarita Kotkavalkama is a passionate knitting hobbyist, who got fed up with the desperate cries for help in the on-line discussions. She decided to write a book herself with an answer to every question by a knitting beginner.
