Stickat för hemmet

Ingalill Johansson

200x225, 120pp

Knit, crochet and make felt from wool! Relax, enjoy, and renew your home.

In this book, knitting designer Ingalill Johansson has collected her best descriptions for those of you who want to handiwork your way to a whole new interior.

Whether you are a full-fledged knitting enthusiast or a curious beginner, you will find the degree of challenge that suits you.

You will find about thirty patterns of everything from pillows and blankets, to puffs and bags. If you want to put your personal touch to an armchair, mirror or lamp, you will get the pattern for that as well.

We move through three themes, each made with wonderfully soft and thick wool yarn. The Natural White standing for the romantic, cozy, back to nature, the Grey – for the more rugged and modern, while the Black / White theme reminds us of the 50s with its stylish and graphic expression.

Inspiration comes from the island of Gotland, where all the beautiful pictures are taken.

About the author:

When she was only six years old, **Ingalill Johansson** learnt to knit from her mother. That was the start of a great interest and since then her life has consisted of knitting, yarns and design. After many years in the yarn branch, both as a chief designer and with responsibility for production in one of Sweden's largest yarn suppliers, she published her first knitting book in 2010 – a book about knitting with organic woollen yarn. The book was a great success, has been sold to several countries and translated into six languages.
