Goodbye all shapeless, plain factory-made mittens!

In the new book by the Master of the Knitting Needles, known for her in your face knitting blog and her sock book, there are patterns for mittens, gloves and fingerless mittens, which definitely will attract attention in the streets. The well-fitting and outfit-matching gloves and mittens are made from luxurious wool, which feels pleasant against the skin.

Patterns advance from down-to-earth to showy and romantic, Briosche knitting is made and even a third colour is introduced into the colourwork knitting. Challenging knitting patterns build up character and teach patience. The Master of the Knitting Needles encourages you to bravely try and accept small mistakes at least with the mittens. Love yourself and your neighbours – build up your character by knitting.

About the author

Tiina Kaarela is an editor and a blogger, who has knitted ever since she was 6 years old. The Mitten book is her second knitting book, and the third book's content is knitted caps (will be published in 2017).
