## Paper garden

Fideli Sundqvist  
180 x 240, 128 p

*Paper garden is a practical inspirational book containing around 40 paper projects, everything from flowers and leaves to bouquets and plants. Step by step and with the aid of templates we are shown how to make botanical creations of paper, to begin with slightly simpler leaves and then more complicated patterns, such as cacti, monstera deliciosa, geraniums and tillandsia, as things develop.*

*P*aper garden is the follow-up to Fideli Sundqvist's debut book *I love paper* which came out in 2013 and is now available in four countries. Apart from an introduction to various different techniques and projects with step-by-step instructions we have a source of inspiration in the form of core ideas with plants and animals from all corners of the world. Now you can let your creativity flourish and make a rich flora come alive, when and wherever you wish.

## About the author:

**Fideli Sundqvist** after graduating from the Arts Faculty in 2011 has worked full-time as a paper artist.

As well as advertising campaigns around the world and designing stamps and book covers, she has worked with public decors and exhibitions. Using different ways of working with paper she creates both two and three-dimensional objects; from silhouettes and sculpture to constructed stories and props.
