## Leikkaa paperitähtiä

Kristiina Töyli

210x255, 128 p

*Paper + scissors = magic!*

**W**onderful patterns can be made from plain paper – any patterns, not just traditional snowflakes, when you fold the paper in a suitable way and when you know what to cut off.

With Kristiina Töyli's instructions you can cut from paper breathtakingly fine five, six and eight point stars, snowflakes and other patterns. You also learn to design your own star models, fold paper and choose the right cutting lines, by which the patterns will show their best features. The book is suitable both for a starter and more experienced paper-star cutters, and it has an abundance of pictures and illustrations.

## About the author

**Kristiina Töyli's** enthusiasm with snow stars comes from her childhood. The windows of her home, which was a parsonage in Northern Finland, had to be decorated with snowflakes every Christmas on the side facing the road. Kristina's mother still has the snowflake, which the daughter had cut for her Christmas present when she was three years old.
