Tips

Closing words & Thank you

Plastiikka, plastiikka! Virkkää kaunista muovipusseista

Satu Latvatalo

210 x 255, 160 p

Everything started with the playhouse mat.

A beautiful and moisture resisting mat was needed, and could not be found in the shop. She had to make it herself, decided Satu Latvatalo – but what would be the material? While going through the cupboards she found a roll of rubbish bags, and soon the scissors were cutting the bags into strips. Next Satu took a crocheting hook and the final result was a round mat. That was not the only item she crocheted, but soon there were glass mats, place mats, baskets for keeping things in, flower-pot cozies, bags, slippers, wash cloth, even lamp shades...

Satu Latvatalo's crocheting instructions exploit all kinds of stuff found at home and which can be used for making suitable furnishing items for the home and garden. The material is plastic – but any other ribbon can be used as well. Follow Satu and let your creativity loose!

About the author

Satu Latvatalo is a clothes designer by trade.

She got first excited about crocheting and then found polythene plastic bags for material when the children's playhouse needed a moisture resistant mat.
