Everyone can knit for children!

At last a book of easy patterns for children's clothes! Many people love to knit for children and the demand for easy patterns is great. Now here's a book that makes it easy for anyone to start knitting!

Simple knitting for children inspires us to start knitting! For one's own children, grandchildren, children of friends, children of neighbours...

The book contains uncomplicated projects and easy patterns for children's clothes: a cosy shawl to put over the shoulders, a tube scarf to wrap round the neck, an oversize jumper for frolics in the woods.

The book is aimed at beginners and inexperienced knitters, but the patterns are of varying levels of difficulty, so there's also something for competent knitters.

The patterns in the book are for children of 0–5 years and are illustrated with lovely pictures and clear instructions together with advice on wool, size of knitting pins and so on.

A foundation educational knitting- and weaving school is included in a separate chapter.

About the author

Stina Tiselius is a graphic designer. She has a passionate interest in most types of handicrafts and writes the blog *garnterapi.com*. She has earlier written the book *Knitting Potholders*.
