- The best and worst aspects of moving
- Thanks
- Sources and links
- Index

## Flytta smart

Paulina Draganja  
x, 144p

*“Have you seen the box with the keys and that?”*

Few things in life create such contradictory feelings as moving: on the one hand there is the desire and excitement of entering into something new. On the other hand the often exasperating ways of getting there. But it really doesn't have to be such a mess! In the book *Smart moving* Paulina Draganja shows you how to organise the work methodically and within a given time-frame make your way through the whole moving process entirely without elements of chaos. You will even be able to fix the paradox of having two incompatible phases occurring at the same time: decluttering before the move and showing the property to prospective buyers.

The book is logically set up in chronological order of the several phases decluttering and clearing, planning, packing, moving, unpacking and organising. Using smart checklists it's possible to minimise any unpleasant surprises that you have missed such as changing the electricity supplier and insurance accounts. Or booking the cleaning company after the move.

## About the authors

**Paulina Draganja** runs the well-frequented blog *Förvaringsdrottningen* and has earlier written two books on storage and organisation. She lives in Stockholm with her husband and two children.
