Kalle Forss, Gunnar Jeppsson
190 x190 mm, 84 p

Tin Crafts contains descriptions of how you make candlestick holders, watering cans, flowers, chandeliers, cake dishes, brooches, and much more from tin cans, beverage cans, caps, and cake tins. The material is all around us – recycled cans and other useful items you have at home and can use to create something yourself!

Here you'll find the basics of tin craft: presentation of the materials and tools you may need and instructions for how to cut, bend, fold, rivet, solder and make patterns in the metal. The book is richly illustrated with photos and instructive drawings. It also describes the history of tin craft. The authors provide instructions for more than 20 metal craft projects you can make yourself plus many more models to be inspired by.

About the Authors

Kalle Forss and **Gunnar Jeppsson** have extensive experience as tin craftsmen and have worked many years as craft consultants in Sweden. In cooperation with Handcraft Publishing (Hemslöjdens förlag) they have previously been featured in the books *Little Crafts* and *Crafts Begin in the Forest*.
