Welcome to the world of crocheted figures! Forget Japanese amigurumi, here are Swedish reindeer, foxes, moles, chanterelles, and sweets – a book full of fantastic figures to crochet!

Do you remember doing it in school? Crocheting small clothes and little mats? But crocheting is so much more than that! And it doesn't have to be difficult.

In this book there are patterns for 27 charming figures, of varying difficulty. At the end of the book there is a basic and easy-to-understand crochet school with good advice on yarns, crocheting needles and other things that you need to know.

Crochet Ragnar and Rosita, robots that get things done. Or the little dachshund gone astray, the car with the caravan going off to the fairground park. Or follow along with Bear and Rabbit out into the mushroom forest, where they find tasty mushrooms and poisonous toadstools.

All the figures are placed in their natural environment – out in the countryside, in a workshop, at home. Two figures were photographed specially in China and New York!

So get your crocheting needles out and some yarn – there are no limits in this imaginary world!

About the author:

Annika Messing works with graphic design when she isn't crocheting and updating her popular blog, virkverket.blogspot.com. This is her first book.
