## Slöjda i trä

Jögge Sundqvist  
190 x 260, 112 p

*Woodcraft is an inspiring foundation book which describes how to make simple, functional and fun wooden objects with a knife and axe. Among other things you learn how to make ladles, bowls, butter knives, cake slicers, hangers, knobs, chopping-boards and stools.*

**W**e get answers on what tools and equipment we need, how to choose the right materials and what types of wood and techniques are most suitable for making different objects. The book contains all you need to know about splitting, drying, whittling, polishing, cutting to a pattern, painting and finishing. There is also a comprehensive wordlist explaining all the trade terms.

The book *Woodcraft* has become something of a modern classic on the subject and was published for the first time in 2002. Now it has been re-published in a fully revised version.

## About the author

**Jögge Sundqvist** is a professional craftsman. He works with fresh and dry wood with handheld tools in a time-honoured crafts tradition and makes among other things painted stools, chairs, knives, cabinets, ladles and troughs. Jögge is strongly influenced by Swedish self-subsistence crafts and folk art from the 17th and 18th centuries and has been active in exhibitions and workshops in Scandinavia, Europe and the USA since 1985.
